## PROFESSIONAL SUMMARY

---

Results-driven Full-Stack Developer with 3+ years of experience building scalable, responsive web applications from end to end. Proven track record delivering high-quality software across the full software development lifecycle (SDLC) — from architecture and API design to frontend implementation and deployment. Proficient in React, Next.js, Vue/Nuxt, Node.js, TypeScript, and RESTful API integration. Experienced in Agile/Scrum environments, CI/CD pipelines, and collaborating with cross-functional teams to ship production-ready products.

## TECHNICAL SKILLS

---

**Frontend:** React.js, Next.js, Vue.js, Nuxt.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, TailwindCSS, Framer Motion

**Backend & APIs:** Node.js, RESTful APIs, Firebase, API Integration, OAuth / 3LO Authentication

**Tools & Platforms:** Git, GitHub, Vercel, CI/CD, PWA Optimization, SEO best practices, Chrome Extensions

**UI/UX:** Responsive Design, Mobile-First Development, Component Architecture, Performance Optimization

**Methodologies:** Agile, Scrum, Code Refactoring, Scalable Architecture, Cross-functional Collaboration

## PROFESSIONAL EXPERIENCE

---

### Examrev | Full-Stack Developer

June 2025 – Present • Remote

- Architected and developed an AI-powered document processing system that transforms unstructured content into structured, exam-ready Q&A datasets, leveraging large language models for semantic understanding.
- Designed and implemented a scalable document ingestion pipeline supporting multiple file formats, optimizing file handling workflows and API interactions for high-throughput performance.
- Integrated AI/ML models via REST APIs for context-aware question generation, improving content processing efficiency and output quality.
- Delivered end-to-end fullstack features across both frontend and backend layers, ensuring a seamless user experience and robust data flow.

### Bridely | Full-Stack Developer (Contract)

November 2025 – February 2026 • Remote

- Led end-to-end development of a production-grade web platform as the sole engineer, owning architecture, development, and deployment independently.
- Built a scalable, responsive frontend optimized for conversion, showcasing bridal offerings and driving customer inquiries.
- Collaborated directly with stakeholders to translate business requirements into technical specifications and delivered solutions on schedule.

### Kiub (v1) | Frontend Developer

November 2024 – September 2025 • Remote, Dubai

- Built a Chrome extension from the ground up, contributing to core features and interactive UI components.
- Integrated third-party platforms including GitHub, Jira, Outlook Mail & Calendar via OAuth 3-Legged OAuth (3LO), enabling seamless cross-platform workflows.
- Implemented complex UI animations and micro-interactions using Framer Motion to enhance user engagement.
- Contributed to core app functionality within a collaborative cross-functional development team.

#### **Faaji** | *Frontend Developer*

March 2023 – Present • Remote, Lagos

- Spearheaded frontend development across multiple product launches using Vue.js and Nuxt.js, collaborating with design, product, and backend teams throughout the SDLC.
- Led a major framework migration from Vue.js 2 to Nuxt 3, building a reusable component library that significantly accelerated development velocity.
- Improved application performance and scalability by refactoring codebase and optimizing the PWA for speed, accessibility, and SEO.
- Enhanced UI/UX consistency across multiple products, implementing responsive design patterns and modern frontend best practices.

#### **Futsal Lagos** | *UI Designer / Frontend Developer (Freelance)*

March 2025 – April 2025 • Freelance

- Developed user-facing and admin dashboard pages using Next.js, TypeScript, and Framer Motion with responsive design patterns.
- Implemented SEO best practices via metadata configuration and leveraged Next.js font optimization for performance.

#### **Knots & Landings Marine** | *Full-Stack Developer (Freelance)*

July 2024 – September 2024 • Freelance

- Developed a full-featured boating marketplace platform with advanced search, filtering, and listing management from the ground up using Next.js.
- Engineered a performant, scalable frontend with immersive browsing UX capable of handling large volumes of boat and engine listings.

#### **Translynx Marine** | *Frontend Developer (Freelance)*

April 2024 – June 2024 • Freelance

- Independently designed and built a professional website using Next.js and TailwindCSS, aligned with company brand guidelines.
- Delivered a fully responsive, cross-device interface optimized for performance and visual consistency.

#### **Koyesax** | *Frontend Developer (Freelance)*

October 2025 – November 2025 • Freelance

- Built and deployed a production-ready portfolio website for a music artist, emphasizing media presentation, event visibility, and booking pathways.
- Delivered a mobile-first, performance-optimized frontend with scalable architecture tailored to the client's brand.

### **ADDITIONAL INFORMATION**

---

Open to full-time, contract, and remote full-stack or frontend engineering roles. Available for immediate start. Strong communication skills with experience working directly with clients, stakeholders, and cross-functional teams across multiple time zones.
